

2023 COLLECTION | SHOTGUN | PCP AIR RIFLE

ASELKON

www.aseikonarms.com

www.aselkonarms.com

We, ASELKONAŞ, are a well established international company that manufactures and exports Hunting, Sporting, and Tactical Military Purpose Shotguns, Pistols, PCP Air Rifles and all spare parts of firearms in accordance with internationally accepted standards, especially to ATF and CIP proof tests, and Country-Specific Firearms Compliance Regulations. We've been actively operating in the firearms sector since 2006 with our vast experience in manufacturing and exporting to more than 50 countries. Our products are highly appreciated in many leading markets in the world.

Thanks to our 40.000 m² fully integrated production facility, with our dynamic, productive and experienced technical staff, we manufacture every parts of guns from raw material to final product in our own facilities without depending on any

external factor. In this way, in every stage of prodcuton we manage our quality control perfectly and provide a high level of quality assurance.

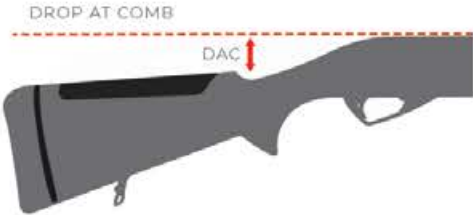

As well as our major operations in international markets, we continue to cooperate with government and military forces in delivering diverse projects regarding armored vehicles, missile launcher platforms, crane – machinery and construction industry.

As being one of the leading manufacturers in firearms industry, we constantly improve our product and service quality with the concepts of high automation and flexibility in order to provide better quality products and effective solutions for the needs customers. We always aim the best in quality and increase the customer satisfaction.

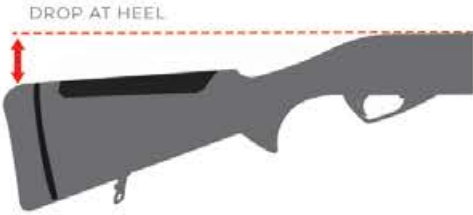

FUNCTIONING | STOCK DETAILS

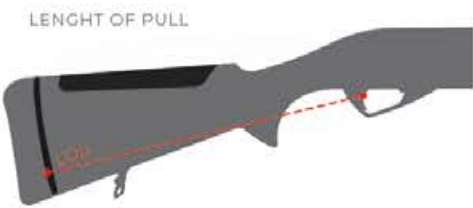

- 1 FUNCTIONING TEST
- 2 CONDITIONS TEST
- 3 3D & GUN CHECKS TEST
- 4 ACCURACY TEST
- 5 PRESSURE DROP TEST

DAC is can be adjustable to 35-39 mm

DAH is can be adjustable to 45-50-55-60 mm

LOP is can be adjustable to -5, -10 mm

Shotguns

SWIVEL KIT

Aselkon recoil pads which are made of a mixture of special polyurethane and rubber materials minimize the recoil and provides a comfortable targeting and shooting.

INERTIA TECHNOLOGY

Our proprietary refinements to the ultra-reliable Bruno Civalani “floating bolt” action ensure the Aselkon Shotguns are able to quickly cycle even the lightest 12 gauge loads. Inertia system consists of 3 main parts; bolt mechanism, rotating bolt, and inertia spring. Thanks to its simple combination, inertia system functions faster and flawlessly. Unlike the gas operated systems, since the burnt powder gas does not contact with the mechanism, system remains clean and requires less maintenance. Aselkon’s rotating bolt utilizes our unstoppable Inertia Technology Locking System to ensure positive bolt head lock-up to the breach under all conditions.

Each Aselkon barrel is subjected to a proof test with 1500 BAR high pressure test cartridge before leaving our factory.

Aselkon’s improved loading mechanism provides the user quite a smooth loading.

The center of gravity is balanced on the forend to ensure a comfortable carry and practical shooting.

We engineered the interchangeable InterPro Chokes to maximize the constancy of shot placement through reduced friction that enhances load speeds.

Aselkon barrels are standard with our precision drilling, honing and chrome coating process. Aselkon Barrels are designed to increase accuracy, to shoot comfortably and function superbly with both light and heavy loads.

HYBRID SYSTEM

Gas powered automatic system. It consists of a self-regulating gas system with a short-stroke piston. It is placed at the bottom of the chamber, near the chamber, to use the hottest gases at a higher pressure.

Gases exiting the barrel expand (in the self-adjusting gas system) and rapidly accelerate the stroke of the piston, which simultaneously strikes the bolt follower pin and pushes it hard enough to cause it to retract. The gas inlet valve is self-regulating as it acts as a regulating valve that expels excess gas during ignition.

The larger the volume of gas flowing through the barrel, the faster the pin valve opens and lets it out, thereby reducing the pressure inside. Self-adjusting, it guarantees shooting accuracy, reliability, durability and certifies Aselkon's technological excellence.

TWIN PISTON/ DOUBLE PISTON

The pistons are required to move only 1/2" for complete cycling which results in a faster operation with minimum vibration and quick target acquisition.

Each Aselkon barrel is subjected to a proof test with 1500 BAR high pressure test cartridge before leaving our factory.

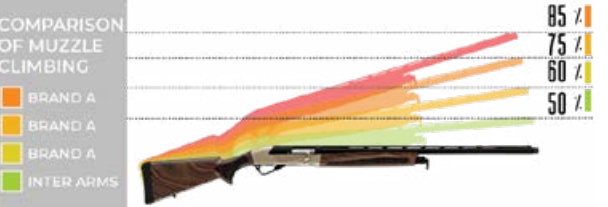

The receiver is fitted with a generously sized charging handle and bolt release as well as a beveled loading port with an outward angled cartridge drop lever insuring the inter is easy to operate even with gloved hands.

INTERPLUSCHOKE

We engineered the interchangeable InterPro Chokes to maximize the constancy of shot placement through reduced friction that enhances load speeds.

.INTER. BALANCED

The center of gravity is balanced on the forend to ensure a comfortable carry and practical shooting.

INTERBOREDBARREL

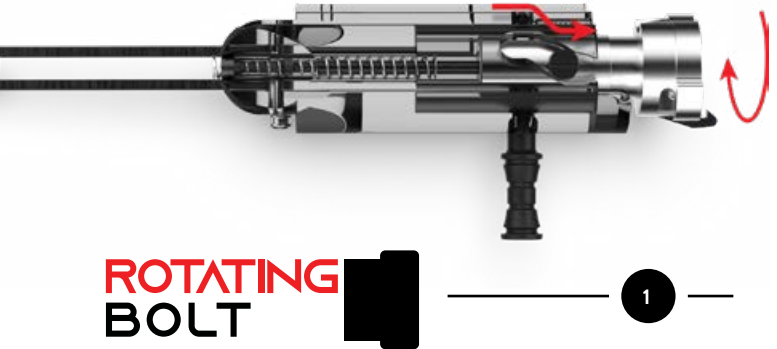

Aselkon barrels are standard with our precision drilling, honing and chrome coating process. Aselkon Barrels are designed to increase accuracy, to shoot comfortably and function superbly with both light and heavy loads.

COMFORT RECOIL

The recoil pad is designed for comfort and fast shouldering with high tech microcell material. It's not only a shotgun, it's an experience.

S3 MODELS HYBRID

the most
COMFORT POWER

HYBRID SYSTEM

S3 is a pump action: S3 is one of the best possible choice for any operational or defense requirement. This is thanks to its flexible use (lethal and less than lethal ammos), easy handling, precision and high firing volume.

The interchangeable stocks-fixed drop, variable drop and pistol grip-only increase the versatility of this weapon.

EXTRA RAIL

The new forearm with multi rail system allows the mount of mini-rails (5-slots) all over at 3/6/9/12 o'clock.

3

The receiver is fitted with a generously sized charging handle and bolt release as well as a beveled loading port with an outward angled cartridge drop lever insuring the inter is easy to operate even with gloved hands.

4

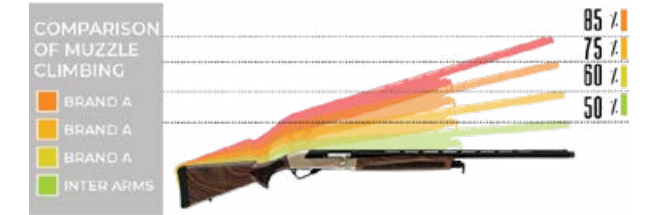

Each Aselkon barrel is subjected to a proof test with 1500 BAR high pressure test cartridge before leaving our factory.

INTERPLUSCHOKE

5

We engineered the interchangeable InterPro Chokes to maximize the constancy of shot placement through reduced friction that enhances load speeds.

6

The center of gravity is balanced on the forend to ensure a comfortable carry and practical shooting.

PCP Air Rifles

COMFORT RECOIL

1

It is a shock absorbing shoulder system made of a mixture of special polyurethane and rubber materials.

ADJUSTABLE TRIGGER

2

Setting the trigger distances according to the finger structure of each user; (right, left, up and down trigger setting) designed to make the trigger system.

ASELKON MANO METER

3

Pressure gauge showing the dry air pressure inside the tube without disturbing the visibility

SLIENCER

4

Specially designed muffler system to provide a quieter shot opportunity

PICATINNY 2mm

5

Binocular rail system in Nato standards, adapted visually and aesthetically with the body

COMFORT COMB

6

It is a cheek system obtained from special raw material mixtures in order to prevent slipping of the cheek during aiming and to ensure comfortable aiming while maintaining the face sensitivity.

ERGONOMIC GRIP

7

It is a pistol grip system designed from special materials for comfort and ease of grip.

INDEX MAGAZINE

8

It is a magazine system designed from special materials for automatic pellet scrolling after pellet filling.

EMPERADOR LS1

EMPERADOR LS1

- High precision accuracy.
- Tube can be replaceable without pressure loss.
- Improved new generation regulator enables easy and consistent setting.
- Power setting lever increase the range efficiency in use.
- Larger magazine capacity.
- Reinforced polymer stock with ergonomic rubber grip.
- Foldable Tactical Stock, adjustable cheek riser and recoil pad.
